

ICCSYN[®] CTL BASE OIL

Description:

ICCSYN[®] CTL base oils are API Group III Plus based on CTL (Coal To Liquid) technology. Their unique synthetic composition, with no aromatics, naphthenic, sulfur and nitrogenous content, is designed to enhance performance over conventional base oils in many extreme applications.

The basic technology behind the CTL process, known as Fischer–Tropsch synthesis, which is the heart of the Coal-to-Liquid technology as it is the process by which synthesis gas (or syngas, a mixture of carbon monoxide and hydrogen) can be converted into unique synthetic composition.

Characteristic:

- High viscosity index
- Low volatility
- Low pour point
- High flash point
- Outstanding UV and thermal color stability.
- Excellent oxidation resistance
